Summary

Data Science enthusiast with experience building end-to-end machine learning and analytics solutions from data preprocessing to model deployment. Skilled in Python, SQL, Machine Learning, PostgreSQL, Power BI, and feature engineering, with hands-on experience developing predictive models, scalable data pipelines, and business intelligence dashboards for real-world applications.

Projects

Credit Risk Assessment System | XGBoost, SHAP & Full-Stack ML Application

Python, XGBoost, SHAP, Flask, React.js, PostgreSQL, Scikit-learn, Pandas, Power BI

- Built an end-to-end AI-powered credit risk assessment system analyzing 255K+ loan applications using XGBoost with 22+ engineered financial features.
- Developed an explainable ML pipeline achieving ~70% default recall (ROC-AUC: 0.76) and integrated SHAP for transparent risk prediction.
- Designed a secure full-stack application with React, Flask, PostgreSQL, and JWT authentication, enabling automated loan evaluation and decision support.

Shoplytics AI | Enterprise Data Pipeline & Business Intelligence Platform

Python, Pandas, NumPy, Flask, PostgreSQL, SQL, Power BI

- Developed an enterprise retail analytics platform processing 17K+ transactions through unified batch ETL and real-time data ingestion pipelines.
- Built reusable validation, feature engineering, and PostgreSQL data governance frameworks to ensure high-quality, consistent analytical data.
- Created an executive Power BI dashboard delivering actionable insights on sales, profitability, customer behavior, logistics, and promotional performance.

Supply Chain Performance Analytics | Business Intelligence & Predictive Analytics

Python, SQL, PostgreSQL, Power BI, Scikit-learn, Random Forest, Pandas

- Built an end-to-end analytics solution on 172,765 global e-commerce orders using SQL, Python, Power BI, and Machine Learning.
- Developed a Random Forest model achieving 75% accuracy, 84% precision, and 70% recall for shipment delay prediction.
- Designed executive dashboards and uncovered logistics bottlenecks and key profitability opportunities through advanced EDA.

Virtual Experience

Deloitte Australia – Data Analytics Job Simulation (Forage)

June 2026

Tableau — Excel — Data Analysis

- Built interactive Tableau dashboards to analyze manufacturing machine downtime and operational performance.
- Applied Excel-based business rules to classify employee equality metrics and derive HR insights.
- Delivered data-driven recommendations through visualization and business analysis techniques.

Skills

Skills: Problem Solving, Analytical Thinking, Data-Driven Decision Making, Teamwork, Adaptability

Education

Vidyalankar Institute of Technology, Wadala

2024 – 2028

B.Tech in Computer Engineering
