Summary

Data Analyst with hands-on experience in SQL, Python, Excel, Power BI, and Tableau across end-to-end projects: data cleaning, EDA, statistical analysis, predictive modeling, and dashboard development. Experienced in financial and equity research analysis. Skilled at turning raw data into KPIs and clear insights for business decisions.

Education

Vidyalankar Institute of Technology **Expected May 2028**

B.Tech in Computer Engineering · CGPA: ***9.12/10*** *Mumbai, India*

Experience

Edify Equity **Sep 2026 – Oct 2026**

Equity Research Analyst Intern *Remote*

- Performed financial data analysis using sectoral financial ratios, economic indicators, market cycles, and technical analysis to evaluate equities and sector trends.
- Built dashboards to visualize market and financial data, supporting research insights and data-driven investment decisions.
- Applied risk and portfolio management principles, including derivatives (futures and options) basics, to assess risk–return trade-offs.

Projects

Supply Chain Performance Analytics | *Python, SQL, Scikit-learn, Power BI* **May 2026 – Jul 2026**

- Cleaned and analyzed **172,765 e-commerce orders** using SQL and Python to identify regions and shipping methods driving delivery delays; built a delay prediction model with **84% precision** and **75% accuracy**.
- Developed a Power BI dashboard tracking delayed-order rate, shipping time, regional profitability, and fulfillment KPIs.

Shoplytics – Retail Sales Analytics | *Python, SQL, Power BI, Excel* **Jan 2026 – Apr 2026**

- Cleaned and analyzed **17K+ retail transactions** with Python and SQL to uncover revenue trends, seasonal demand, customer behavior, and profitability drivers.
- Built an interactive Power BI dashboard with DAX measures, slicers, and drill-downs for revenue, profit, order volume, and category KPIs.

Credit Risk Assessment System | *Python, SQL, Scikit-learn, SHAP, Power BI* **Oct 2025 – Dec 2025**

- Analyzed **255K+ loan applications**, engineered **22+ features**, and trained a classification model with **0.76 ROC-AUC** to identify credit-default risk.
- Used SHAP for model explainability and built Power BI dashboards on risk segments, approval patterns, and portfolio exposure for non-technical stakeholders.

Technical Skills

BI & Reporting: Power BI, Tableau, Excel, DAX, Dashboard Development, KPI Tracking, Data Visualization, Data Storytelling
Programming & Databases: Python, SQL, PostgreSQL
Libraries: Pandas, NumPy, Scikit-learn, SHAP, Matplotlib, Seaborn
Analytics & Statistics: Data Cleaning, EDA, Statistical Analysis, Feature Engineering, Predictive Modeling, Model Evaluation
Finance & Research: Equity Research, Financial Ratio Analysis, Technical Analysis, Risk & Portfolio Management, Economic Indicators
Tools: Git, GitHub, Jupyter Notebook
Core Strengths: Analytical Thinking, Problem-Solving, Attention to Detail, Communication

Certifications

Deloitte Australia Data Analytics Job Simulation | *Forage – Tableau, Excel, EDA* **June 2026**

- Analyzed manufacturing data to find machine-downtime patterns, built a Tableau KPI dashboard, and applied Excel validation rules to classify workforce data.

Achievements

2nd Runner-Up, **TCS Technology Day 2026 AI Hackathon** – built a RAG-based Interview Intelligence System with semantic search and document retrieval.
